Planged ♂ (party with adf9)			sosial		Islo (party: Karma)	
jam	siapa	buat apa	sama siapa			
1714	♂ M	out of 2nd luli batu tree + moves to tree behind ♀ to F/chew over there. ♀ turns her head around to ♂ for several seconds then keeps on F again with head 'straight.'				
1726	♀	is 'finished' and moves to sit next to ♂ on branch within 2m. ♂ is still slurping on his wrist fur				
1734	♀	is now really peering at ♂ chewing + slurping on wrist				♀ ♂ R
1737	I think	♂ just R sits now, no F anymore				
1739	♂	scratches his ass				
1741	The sounds (monkeys?) I heard before I haven't heard anymore for the last 1/2 hr or so					
1742	♂	moves away dulhan				
1743	♂	scratches his right side with left hand hearable, over 10x while M on the R hangs for minute + looks in direction of ♀ then moves on and R sits in that tree while looking 215°				
1747	starts building N					
1800	♀	continues building N after over 4 minutes of no movement				
1801	She	bites branch through and puts it at south end of nest (pillow) then again at accompanied with raspberry IIII				
1803	She	takes a branch from 2m below nest (tampa leaf?) (while getting out of nest) and chews bites it through 2x after breaking it off from the tree with her hand and then galeks galeks. I didn't see where she put the branch exactly (selamat/batal/also?)				
1815	observers pulang					
1707	Karma moves to a different tree + slurps /cleans her mouth/teeth from fruitsap with the fur on her hand/wrist/arm. Subsequently Islo moves to the spot where Karma had been F. Karma brought with her a branch with luli batu fr. (holds it with foot) (see photo?; also on the photo you see the sap in her hand)
