jam siapa buat apa sama siapa

pagi: anak di sarang ?

Ibu/sendiri

6.13 Frisca kencing + keluar sarang

6.14 Things fall down: berak? (Frisca)

6.16 Freddy keluar sarang sendiri, ada kencing; probably Freddy but could also be Frisca again

6.18 pretty sure they are F but masih sedikit gelup

6.22 no sounds of falling Pr anymore

6.25 again sounds of falling fr. (Frisca?) I don't see her but fr are falling down from where she went

6.26 Frisca Pr fall regularly down

6.28 I guess Freddy is AP 2 meters above her (I see branches moving)

6.30 Bawa lihat Freddy in cling position, maybe/probably he was like this already

6.32 I now I see him peering towards what Ibu is doing

6.52 Frisca moves, Freddy 22" behind her

6.55 Frisca berak (tingg. 20 m)

SOSIAL

jam siapa buat apa sama siapa

1002 2x menangis Freddy, then scream + menangis
Only Fikar saw what happened (see date Fikar).
According to him Freddy fall down ~~from the branch~~
with his neck on a branch (stopped him from
falling further). Ibu grabbed him.
Also this morning Frisca grabbed ~~Freddy~~
wrong and almost fell down herself (don't remember
the exact time)

1020-1030 somewhere here Frisca starts Frayap (see date Fikar / Mamudin)

1036 Frisca & Freddy still R within 2m of each other + Elly
1038 Frisca Fpr, then ~~moves~~ moves dula (mj 25m), Freddy comes. Frisca moves
back, moves underneath Freddy; ~~to~~ to rang. Freddy follows.

1042 long (1 min) menangis everytime Frisca lets go of Freddy in between M
Frisca makes high weird sounds as well. Freddy screams now, far below (75m)
Ibu, but he went self further down; Frisca just keeps on F malaka fr; Freddy still menangis
look through my binoculars at Freddy who doesn't seem to be bothered or whining
so maybe it was Elly, but when I have a close look at Elly the whining had
stopped and Elly was F

656	Frisca	moves lewat Freddy	down the tree > 5m but Freddy slowly follows
657	Freddy	Cling	Frisca moves and Elly follows slowly (whole time at 12.00)
700	Elly & Frisca	dekati < 1m	Freddy is < 2m above them } photo Gug/600 both F & Elly sitting face to face
716	I think I hear	branches moving far away	(other mawas?), no response
		like yesterday they spit out a bit	(F + Elly lick her fur) also chewing sounds can be heard again, so it is probably kuli batu
	Freddy	R sits	this whole time
721	Frisca	brakes	branch off and eats the fruit's directly with her mouth
722	Frisca	Socgrooms	Elly's fur with hand and also rx with mouth on Elly's back
723	Frisca	now licks	her own fur on arm
726	Freddy	D susu	according to Fikar & Mamuddin
737	Freddy	moves down	Freddy takes over her position and starts eating himself
739	Freddy	faces	Frisca, both are eating I didn't see any begging
742	again	branches are moving	behind us (southeast)
743	Frisca	moves lewat	Freddy
744	Freddy	sits down	behind / next to Frisca
745	Elly	dekati	Frisca (but behind her < 1m)
747	Frisca	masih F	getting the fr directly from the branch now with her mouth as well; Freddy watches us, while F as well (at slower rate)
752	It is not	Elly but Freddy	that's directly behind Frisca but Elly comes closer now as well, both watch Frisca F
753	Freddy	moves up to above	Frisca, F; Frisca licks fur quite regularly, slurping sounds can be heard. all 3 of them are F < 1m now
802	pohon mati	fell	north-east; Freddy watches Fikar moving, Frisca looks also after Freddy comes closer to her. Seemed like Freddy stretched his hand in Frisca's direction, if it was meant as begging, the begging was unsuccessful. The whole time Freddy is however also F by himself. It seems as if Freddy is peering extensively when Frisca slurps her fur.
812	all again	< 1m; all F	sendiri facing each other. They all point their lips at fr, fr can be seen on it. Freddy doesn't chew that often as the other two. little bits of the kuli's of the fr is falling down. he just holds his lips like that with the fr on it
822	Freddy	stretches	his fur at his left elbow with his right hand and "blosses" his teeth (slurp sound); not really sucking movement though maybe by coincidence this simultaneous slurp sound was from Frisca
824	All 3	are eating	Freddy is 1m down hanging right above Elly looking at us I think (tinggi: > 25m) Frisca hangs a bit further down. (2m lower)
832	Frisca	Socgrooms	Elly with hand (ass + backside) and also with her mouth grooms Elly's back → Mamuddin videotaped this
856	Frisca	Frayap	Freddy is watching; just before they all (except Freddy?) F Wakar tombran then they are all M, Elly dulu, but now also Frisca. Gibbons are close; they all look into the direction of the gibbons (until 858)
910	Gibbons	are really close	now; Frisca is still F malaka

944	Scream / menangis really loud until 945	
	Frisca was first 3m high, moved up to 10 m and waits there	
947	3x soft whining	
950	1x soft whining ; all F malaka fr	
952	Freddy APM ? move until F	
1120	Freddy scratches himself with left arm on right sholder.	
	I guess it was Freddy whining as now he whined again following Frisca while Frisca moves away	
1120	Frisca gets fr with lefthand straight from branch ; bending branches towards her mouth	
1126	You hear wind coming lots of wind! mendung sekali!	
1129	Frisca and Freddy move to eat underneath leaves branches just before when you heard the wind coming from far away Freddy went straight into cling ; very loud wind + thunder in background.	
1136	thunder - all 3 took north east from where wind is coming	
1140	Frisca still Rhang / stand with Freddy in cling that's why now they are watching us (we just got our raincoats on)	
	They are 15 m high near the trunk of the tree (← wind?)	
1144	Frisca Rhang / sit , now climbs up sits near tree trunk and scratches the back of her hand.	
1145	Frisca moves into another tree via light / thin branches while you hear wind coming (20 m high, Freddy still cling)	
	Frisca is sitting on end of branch while wind is quite strong	
	Then she moves into another tree again (30 m high now)	
1150	Frisca F fr Malaka 30 m high picks fr with right hand from branches	
1153	Frisca holds branch with foot near body, then picks the fruits off with	hand
1156	it starts raining, they move.	
1200	F fr Malaka, meanwhile heading from rain. Seems as still eating while hiding a lot for rain (20 m + cling); ya pasti makan pakai tangan kanan.	
1206	thunder again but less close this time ; Elly for a while within 10 m	
1209	Ka stronger rain and wind (rain not really keras 'keras')	
1210	rains again more + wind is stronger still not really keras strong rain though	
1214	Frisca F slower than before rain wind; R moves bt down & R sits?	
1216	rain again gets stronger without getting really strong	
1222	Frisca makes umbrella from (Tesantang) ketapan lvs (pohon batang putih merah)	
1233	Frisca places the umbrella lvs / branch on branch tree (trunk) gently as if she wants to ^{use} them later again; Freddy still cling	
1233	Indeed Frisca gets the same umbrella again above her head places it on her sholder while she gets another umbrella of ketapan lvs that she puts on her neck / head	
1224	Frisca R sits with 2 umbrellas on her head and Freddy in cling (20 m high)	
1227	Frisca moves higher up (Freddy still in cling)	
	Freddy moves via her mams back and sholder higher up to wands belly front side. Meanwhile Frisca moves the umbrella to the side - away from her neck / sholder ↔ so that Freddy can pass - it's easy.	
1228	Frisca resits in different position facing south (I guess)	
1232	Frisca brakes off another 3 payungs while still sitting in ketapan / Tesantang tree and then she moves	tree

1248	rain	gets bit stronger again still not really strong, could be worse	
1308, 14, 22, 23, 24	Frisca	looks up	
1326	Frisca	changes position a bit and puts her umbrella to the side and still holding it as if checking whether it is ok to go again on with normal daily activities again	
1327	for a moment	it seemed rain got stronger but almost the same moment it got back to how it was

1332	Frisca	Rests + cling (13m high) still hiding for rain it seems under leafy lianas near a tree trunk of another tree. Seems like she is also eating (lianas). Fikar says they are yf. Nevertheless they look quite green and big already.	
1336	Rhang	moving (13m high) 1340 only sebentar Fikar lu than Mt a bit, waiting, Mt	
1344	Freddy	scratches / pounds back head 4x with right arm than Frisca gets him into cling position again	
1346	longcall	but couldn't see their response to it though they were resting (not moving or F) while looking in the other direction as longcall	
1424	Rhang	in Malaka tree, Elly went into the same tree via a higher branch. again menangi as Frisca climbs up, I am pretty sure Freddy was still cling and response to the longcall	
1430	again Elly	moves away to other side of tree as Frisca comes and response to the longcall closer. <u>menangi again, clearly from Freddy as Elly is F</u> ; birds fly over over really close. Frisca climbs up to Freddy, not doing though. Both F fr Malaka. Little Freddy is less than 2m away but moves > 2m away. Frisca turns her face into Freddy's direction and grabs fr in front of her + continues eating at this same position. ^F	
1434	Frisca	moves a little bit in direction Elly; Elly moves away again	
1438	Frisca	grabs fr with hand.	
1450	I am	searching for kalpen while Frisca Mc / Mg and Freddy follows (distance 4m); then Frisca starts F again. Frisca rests; Freddy slows down, Frisca moves again (a bit) Freddy moves up as well. Frisca waits in bridge pos. Freddy mendakati within 2m but starts menangi when Frisca moves 1 arm away. Frisca then collects him.	
1454	Again Freddy	waits to AP 2m away. Frisca grabs his arm & they move; seems that Elly is whining (high pitch low pep sound)	
1455	Elly	wants to follow Frisca but comes almost to the branch is

1454	Elly	Seems like Elly is whining (high pitch deer peep like sound) looks like she wants to follow F&F into the other tree but is afraid to grab the branch that gets her across. When she finally grabs the branch, this branch brakes (half-still hangs there) so that she falls against the lower part of the branch:	
		Then she stops crying. Frisca watches all this time then & waits	
		Elly moves goes towards Frisca who who is still waiting it seems	
		but then Elly moves again into other tree. Menangi (bit) again (while still within 2 m from Frisca). They all Rest.	
		Then Freddy F 1u akan tombang, Frisca moves, Elly moves	
		Elly & Freddy SP (tangan - kaki)	
1502	Elly	Elly moves towards Frisca < 2 m (Freddy < 5 m)	
	Freddy	Freddy climbs up until right above Elly and looks down to Elly (as if Peering), then he climbs further up again	
	Elly	Elly m; > 2 m dullu	
1538	Frisca	Frisca m; in other direction, Elly moves back and follows her again	
1755	Elly	Elly md < 2 m	
1757	Frisca	Frisca m; > 2 m but waits, Elly hangs, Freddy sits 30 sec later	
	Freddy	Freddy comes, Frisca climbs further down	
1759	Elly	Elly comes down as well, Freddy APM while Frisca makes bridge	
	Freddy	Freddy comes, Elly went by herself via a higher branch	
1801	Frisca	Frisca makes Nest, Freddy watches her from 2 m above, Elly is more down (another tree) already (5 m lower). Freddy doesn't do any AP, he just seems to watch Frisca & watching around.	
1803	Elly	Elly climbs up again < 2, also a bit above Frisca & the Nest. Freddy comes down a bit. Both are directly above Frisca:	
	Freddy	Freddy also Elly watches Frisca building the nest	
1804	Elly	Elly climbs higher up (m; > 5 m) and pulls the top of the tree down by hanging on the branches and pulling it down with a strong, short pull. It seems as she pulled the top of the tree down and formed a platform on which she is building her nest by folding more branches (from that height) in.	
1807	2 raspberries	Elly while making alas (start making alas)	
	1 raspberry	Frisca after watching Elly for a bit. (still alas)	
	1 "	Elly again - 2 raspberry Frisca breaking branches pulling them alongside Mouth. 1 raspberry Elly (folding branches at the outer side of the nest) Frisca is still working on the alas.	
1810	Elly	Elly golek, seemed like Elly at last made a pillow. Elly still seems to be watching Frisca from her Nest. Frisca seemed to make a selimut but then gets up again; so selimut
