pagi: anak di sarang ? Ibu/sendiri

532 N pagi → ambil GPS coordinates

jam jarak ibu-anak cuaca pohon sama/lain

548 looks like pohon mati: fell NW ~500m away, but everything remains quiet. From ~200m this night It rained briefly, windy. Around 4:30 hr the rain stopped. It is still windy.

6:00 O moon gelap sama

6:30 1 mendung

6:30 1 rain

7:00 1

7:30 rain

6:13 Both N tree (F&F E) are moving but the focus are still in there

8:00

6:14 Kc + berak. sounds big so probably from Frisca, but not sure

8:30

Elly keluar sarang + berak (md < 2 m)

9:00

6:46 2x scratch Frisca with left hand under right arm

6:47 Frisca my >2 Freddy follows Elly follows >2

6:50 Seems like little green seeds are falling but I'm not sure whether they were already on the ground or blown out (could also be sounds from raindrops falling?) No indeed ~~green~~ little green (lijung sedikit merah) are falling ⇒ matak payo menangis? - Freddy? or suara bergerak pohon

7:17 F&F (daty) M, Elly follows >2 (10+)

7:18 all F fr Malaka (Freddy?) "different trees though."

801	Elly mij > 2, Frisca scratches herself with left arm ^{on} right shoulder. Frisca ate ants by holding her hand against tree trunk, licking the ants subsequently from her hand. Then she stripes get pieces of bark from the tree trunk and keeps continues by putting her hand against the trunk and licking off the ants again.		
Dog	Freddy gets arm against branch but Frisca pushes his arm back. Frisca 2x gets a branch and licks the ants directly off the branch. Again Freddy tries to get a little akar branch, but now Frisca keeps on F herself paying no attention to Freddy anymore as it seems, though she almost hits the akar Freddy is holding (accidently?) but Freddy drops this akar branch anyway. Once Frisca is not moving her arm for a moment (to eat/lidh ants off) Freddy straight away stretches his head/neck to have a closer look at the tree trunk. Frisca was eating the ants from. But Frisca starts F again and Freddy moves his head back again.

1458 1 hear branches moving behind us (N-e; 330°) Frisca looks into that direction, sounds like something is M on the ground 10m away Frisca gets Freddy into cling and moves higher up (they are moving southeast all this time) Sound like Frisca is Fr rayap / semut, licking them off her hands and just before it sounded as she dropped a piece of bark	
1504 Then Frisca moves back in the direction branches were moving and keeps on F again (leaves fall down, and Malaka shells of which daging + biji seems to be eaten. Fr are yellow or green (m / h M))	
1512 Frisca eats fr directly off branch by biting fr in half keeping in mouth, bullet is dropped down (she took 5 fr at once, I couldn't get a Frate as she moved to rest, but she is quite fast at getting the biji and daging separated from the bullet than she spits out the freight away after biting fr into half / biting half off)	
1516 I see not of all fr daging is eaten, maybe that's why she could eat the 5 fr so fast.	eat
1518 I hear again branches moving + chewing sound. Seems to be at st as well. Frisca looks into that direction (Northwest)	
1521 It seemed the branch moving was from Elly as indeed Elly md < 10m. Seems like Frisca is biting fr in half, dropping bullet and spitting out juice. Elly Mt, breaks off branch that is in the way; throwing it down. I hear peeping sound of either Elly or the tree she is in.	
1527 Frisca F daging again as well	
1529 Frate Frisca, biting half fr off, the other half in hand still, you see sap/juice spit out, again biting half off of other fr, sap spit out then putting the halves she is holding in her hand in her mouth. by	
1530 Freddy F again, either fr from his hand or something from tree trunk (like ahan leaves) < 2m Frisca	
1531 also Frisca seems to eat from tree trunk	
1528 Spitting sap out, chewing seeds for a little while, then gets new branch, breaks lower half off with foot, brings fr on branch to mouth	
1533 Frisca mj > 2m, Freddy is still F from hand (fr/rayap?)	
1535 Freddy APO ahan branch / Frsemut/rayap; sounds like Frisca is F fr Malaka again. They are in different trees now > 2m	
1520 Looks like fr Malaka eaten by Freddy are more ripe (more brown spots) on them so perhaps softer to open), though he <u>only eats the seeds</u> . Also green fruits are on the ground of which only the seeds were eaten, but I am not sure whether they came from Freddy	
1538 I am not sure what Freddy is doing but everytime I look up I get the impression he is eating rayap / semut	
1540 Frisca indeed brakes off pieces of bark (uhan tree). no slurping sounds can be heard and only now and then pieces of bark fall down. Yes indeed now I see Frisca getting her mouth on the bark (15+)	
1543 Freddy is now at the same spot as where Frisca was eating semut. It seems he is eating ants as well also licking them from hand. Frisca is also	copyright by: Sumatran Orangutan Conservation Programme
